DocuPRO

Print and copy accounting software

Budget and accounting software for printers, copiers and multifunctionals

DocuPRO is an easy to manage software package for managing your document flow. *DocuPRO* gives you a clear and detailed view of the generated documents.

Due to the combination of software and the *DocuPRO* terminals you get an unique integration of hardware and software.

■ The Product

DocuPRO is a windows server based accounting software. *DocuPRO* gives you a complete and detailed overview in the total print and copy flow. When you combine the *DocuPRO* software with the *DocuPRO* terminals you can create a pay-for-print environment, in which you have the freedom to have users actually pay for prints and copies or to register it and book costs to a cost center.

DocuPRO is designed as a Stored Value Server or Stored Value Card system. Stored Value Server means the user's balance is stored centrally on a server. Stored Value Card means the user's balance is stored on a card. The possible cards for this are contact cards and contactless cards such as Mifare, Legic, Hitag and HID.

■ The environment

DocuPRO is suited for each surrounding where an overview on the total paper flow is desired, or where charging costs of the generated prints and copies is necessary. *DocuPRO* offers multiple functionalities such as accounting only, secure release, registered printing and copying, pay-for-printing and copying and follow me printing.

■ Target group

Because *DocuPRO* is scalable it can be used in a wide variety of environments ranging from stand-alone hotel business corners, libraries, schools & universities, commercial and governmental organizations. *DocuPRO* can also be used in a multi server environment.

■ Why DocuPRO

DocuPRO fits in all organizations that are in need of a straightforward accounting solution without the need for a dedicated accounting administrator. Furthermore *DocuPRO* offers a completely expandable platform which provides you with a solid base for a complete cashless environment.

DocuPRO terminals
